

# Dilasa Thapa

Full Stack Developer

+919528112901 ◇ thapadilasa71@gmail.com ◇ Uttarakhand, India ◇ LinkedIn

## SUMMARY

Analytical and detail-oriented Full Stack Developer. Highly motivated individual with a passion for creating innovative web applications. With a solid foundation in both front-end and back-end development. Through my attention to detail, strong work ethic, and collaborative nature, I am confident in my ability to make a positive contribution to any team or project.

## PROFESSIONAL EXPERIENCE

### Full Stack Developer

Self-employed

Jun '25 — Present  
Nainital, India

Working independently on designing and developing end-to-end web applications using modern JavaScript technologies. I handle the complete development lifecycle — from requirement gathering and system design to frontend implementation, backend API development, database integration, and deployment — ensuring scalable, responsive, and user-focused solutions.

### Technical Mentor

Kalvium

May '23 — Apr '25  
Chennai, India

- Delivered hands-on, practical training to equip students with comprehensive technical knowledge, preparing them effectively for internships and job opportunities.
- Provided personalized mentorship following the Kalvium framework, guiding students through technical challenges and strengthening their problem-solving and development skills.
- Supported students post-internship placement by helping them refine and align their technical expertise with company-specific requirements and real-world expectations.

## EDUCATION

### Web Development in MERN Development

Masai School

May '22 — Mar '23  
Bengaluru, India

### B.Sc in Computer Science

Kumaun University

Aug '19 — Nov '22  
Nainital, India

## PROJECTS

### The Nest Homestay

- [Link](#)
- Currently developing a full-stack room booking web application using **React.js, Node.js, Express.js, MongoDB, Firebase, and Cloudinary**; built a functional prototype featuring room listings, booking request forms, and dynamic availability.
  - Designed responsive frontend components with **React.js and CSS/SCSS**, ensuring smooth navigation across desktop and mobile devices.
  - Implementing RESTful APIs and database schema for bookings, user interactions, and admin management while collaborating with the client for feedback and iterative improvements.

### Myfitnesspal Clone

- [Link](#)
- It allows users to track calories, monitor progress toward weight-management goals, and gain support from an online community.
  - built the home page and profile page of the user, worked on the navbar and responsiveness of the site
  - Tech Stack: HTML | CSS | Javascript | React | Redux

### Fakesters

- [Link](#)
- Fakesters is an anonymous fake chatting app where users can freely talk to strangers without revealing their real identity. It provides a safe and fun space to share thoughts, vent feelings, or simply enjoy random conversations.
  - Completed core real-time chat functionality enabling dynamic conversations between random users.
  - Currently working on additional features like user account management, random user matching, chat history, and theme customization.
  - Tech Stack: HTML | CSS | Javascript | React | MongoDB | Express | NodeJS | Cloudinary
